

Slate Ventilators

The new range of “Cowl Type” and “Low Line” Ventilators from Thysis Building Products has been developed from 20 years experience in the roof ventilation industry in association with most of the leading manufacturers.

Raised Cowl Slate Ventilators

The 10k and 20k cowl type range offer unobtrusive designs, have patented “anti-splash sleeve” devices and flyscreen protection. 10k square to round adaptors and flexible pipe for natural ventilation or mechanical extract and 20k square to round for “passive stack” if required.

Use: Permits entry of air into roof space for cross flow ventilation or for use with mechanical extract or natural ventilation. Suitable for pitches of 20° and above

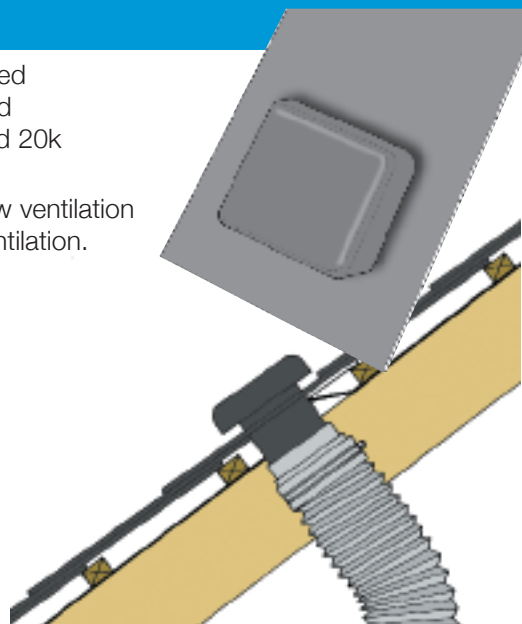

Material & colour: Moulded in Black “HIPS”

SCPS 10-1: 500x250 pinseal 10k cowl

SCPS 10-2: 600x300 pinseal 10k cowl

SCPS 20-1: 600x300 pinseal 20k cowl

STR 110: Square to round pipe adapter to suit 110mm flexi-pipe.

Low Line Slate Ventilators

The new “Low Line” vent has been designed to be both unobtrusive and practical. The 10k ventilation area has no sharp edges to trap leaves and other debris from the roof significantly reducing the risk of blocked ventilation.

Use: Permits entry of air into roof space for cross flow ventilation or for use with mechanical extract or natural ventilation. **Suitable for pitches 17.5° and above.**

Material & colour: Moulded in Black “HIPS”

SLPS 10-1: 500x250 pinseal low line 10k

SLPS 10-2: 600x300 pinseal low line 10k

SLVF 10-1: 500x250 riven low line 10k

SLVF 10-2: 600x300 riven low line 10k

SLVF 10-3: 500x300 riven low line 10k

STR 110: Square to round pipe adapter to suit 110mm flexi-pipe.
